

MANAGED REPLICATION

Key Features

Offsite Storage of Business Data

Can be implemented as part of our Managed Backup service or as a stand-alone service to ensure that your most critical business data is always up to date, protected and accessible.

Recover Your Data — Quickly

Can perform a bare metal restore of your data to dissimilar hardware, getting your business back on its feet, quickly.

Managed by the Experts

We have the right staff and procedures in place to ensure that your data is replicating offsite every day.

Full Transparency Through Reporting

Detailed reports are provided monthly to ensure that you know what is happening and that you can breathe easy knowing that your data is protected.

Threats facing SMBs

- Loss of Data
- Disaster recovery costs
- Cost of downtime
- Compliance

“75% of small and midsize businesses rank data loss as the most significant risk to their business.”

— Applied Research

Disaster Recovery Made Easy

Do you have your data in two places at once? There is no better way to ensure your business keeps running if there is a disaster.

Disasters happen...That is beyond your control, but that does not mean your business has to stop if you are prepared. Having a disaster recovery plan for your data could make the difference between losing everything or just dealing with a temporary hiccup.

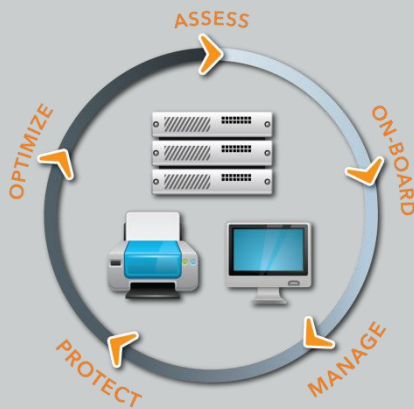

Our Managed Replication service is designed to automatically mirror your onsite backups to an offsite location every day. This means that no matter what happens to your office, your data is safe and recoverable in hours. Don't miss a single day of business opportunity with this solution. Now that's being prepared!

Benefits of a Managed Replication

- **Reduce Your Day-to-Day Operating Costs**
Offsite data storage is more cost effective than manually moving media offsite every day and you never have to worry about forgetting to do it again.
- **Safeguard Business Information**
This solution provides continuous offsite replication of your data, meaning you will be able to recover your data and keep your business running with information from a day ago.
- **Ensure Business Continuity**
Replicate your most critical business applications to ensure that you can get quick access to systems that would have the most impact to your day-to-day operations if they were down.
- **Increase Productivity and Decrease Downtime**
With our rapid restore capabilities, we will minimize the costs associated to lost productivity and downtime.
- **Detailed Reporting Information**
No longer will you be unsure of how well your data is protected. We will provide you with reports monthly that let you know that your data is safe.
- **Total Peace of Mind**
Knowing that your business data is being captured and stored in a safe place, and being handled by expert's means you can focus on your business

Device Lifecycle Management

“47% of business owners directly link lost revenue to data loss and acknowledge they have inadequate data backup procedures.”

– Applied Research
